

Win a Trip to the Zoo!

RARE DISEASE DAY | 28 FEBRUARY 2026

Colouring-in Competition

Enter to win a family pass to a zoo in a capital city of Australia.

How to enter

1. Print the next page for your child or students
2. Let them colour the image using any medium (pencils, crayons, paints, etc.)
3. Submit entry via QR code below by 6 March 2026.

How it works

- All primary school students in Australia are eligible.
- One family pass (2 adults and 2 children) to a major city zoo will be awarded.
- The winner will be chosen at random on March 10, 2026, and notified using the parent or teacher contact details provided.

About Rare Disease Day

Rare Disease Day is a global movement dedicated to creating equity in social opportunities, healthcare, and access to diagnosis and treatments for people with rare diseases.

Since 2008, it has been observed every year on 28 February (or 29 February in leap years – the rarest day!).

Name: _____ School: _____ Year: _____

Parent/Carer/Teacher Contact (name/email): _____

Why zebras? Zebras represent rare diseases, such as primary immunodeficiency (PI). In medical school, doctors are taught to look for common illnesses first when someone is sick. They are told “when you hear hoofbeats, think of horses, not zebras.” But sometimes, doctors need to think about zebras too! For people with PI, being a zebra means having a condition that isn’t common, but it’s just as important for doctors to notice and understand. IDFA is celebrating its 20th anniversary this Rare Disease Day, so this year’s colouring competition includes special celebration-themed elements.
